What about land records on the Ohio site that show Wilcox and Lorraine also were on that Ohio site?  
See email from March 2015 to a resident from EPA:

my name is Katrina Higgins-Coltrain and I am the new Environmental Protection Agency project manager for the Wilcox Superfund Site. I have been working with Todd Downham of the Oklahoma Department of Environmental Quality over the last month to get a better understanding of the site as well as the concerns of the community.

It is my understanding that you are concerned about your property and that you have been in contact with Brenda Nixon, here at EPA. I also understand that she was trying to find you some assistance through the State, specifically the Oklahoma Energy Resource Board and the Oklahoma Corporation Commission. Based on these conversations, it appears that the agency best equipped to address your situation is the ODEQ.

We are trying to learn as much as we can about the Ohio Oil Company which owned and operated a facility located on or near your property. I have heard that there are property deeds of some residences living on or near the old Ohio Oil Company property that indicates Wilcox was a previous owner. I would like to know if you are willing to review your property deed to see if Wilcox is listed as a previous owner. Also, if Wilcox is listed as a previous owner, would you be willing to provide/share with us a copy of the deed?

Please either respond to this email, or call me at 214-665-8143, 1-800-533-3508. Thank you for your time and I look forward to talking with you.

Katrina Higgins-Coltrain  
Remedial Project Manager

These were both refineries that operated adjacent to one another. The Wilcox Superfund site and the Former Transcontinental Refinery Site are being handled separately.

What is the connection between the Ohio Oil Refinery site and the Wilcox Superfund Site - both in  
Bristow, OK and right next to one another?

This is a story for today. My deadline is 2 pm central time.

Thank you!

Janna
